## why choose the plantino collection?

The Plantino Collection is inspired by nature, allowing you to bring the outdoors in with the latest designs in timber and laminate. The Plantino Collection is loved by designers for its stunning designs and versatility that it provides for your home.

Selections within The Plantino Collection are classic looks that will last a lifetime. With a wide range of timber and laminate designs, you're sure to find the right flooring solution for your space.

There is nothing more luxurious than natural timber underfoot; the timber designs featured within The Plantino Collection will provide timeless looks and enduring properties to your home.

If you want to bring the beauty and simplicity of timber into your home for less, then laminate flooring may be better suited for you. With today's technologies, laminate flooring will have you thinking it's the real thing.

# before you buy

**Throughout this brochure you may notice a colour variation between the room and swatch images. Both are the best possible representation of that product within two different photographic environments. It is important to keep in mind that there are a number of variances in addition to lighting that may affect the way your hard flooring looks. This can include paint colour on walls, furniture and décor items that can alter the appearance of your floors.**

## HOW LIGHTING AFFECTS THE LOOK OF YOUR FLOOR

Flooring is one of the biggest surface areas in your home and a key design element to any interior. When selecting your hard flooring, colour plays just as much of an important role as price, style and quality.

It is important to take into consideration how your selected hard flooring may look once it is installed in your home as the lighting in the room will have a significant impact on the way the colour is perceived.

For example, hard flooring that is laid in a room that receives little to no natural light will appear drastically different to a room that has a lot of natural light coming in. It will also appear different as the light changes throughout the day and transitions from morning to night.

## THE EFFECTS OF ARTIFICIAL LIGHTING

Natural sunlight is not the only lighting that has an impact on the colour of your hard flooring; the type of light fixtures you have in the room will also play a part in how the hard flooring will look in your room.

Indirect lighting, such as a wall bracket aims light toward ceilings or walls, whereas a lampshade or floor lamp has a wider spread of light, therefore the light displayed will rebound against walls and floor.

For the best representation, we recommend going into your local Choices Flooring store and request to take a sample of your desired colour home. In addition, take a sample that is a shade darker so you can compare the two shades in both natural and artificial light at various times throughout the day to ensure you are happy with the true colour of the product within your room.

The actual swatch appears most like the mid to dark sections of the room image.

Depending on the sheen and texture of the product, under natural light your flooring can appear drastically lighter.

Wall colour and furniture can appear to change the tone of your flooring due to colour reflection.

### **Not all timber is the same.**

There is a large variety of choices when it comes to selecting the right timber flooring for your home. You will need to consider the type of wood, colour, price and lifestyle when making your decision.

Timber flooring is as an investment for your home, generally, timber will provide years of reliable service, however, be sure to take all criteria into account to ensure you get the best value in your selection.

## CARE & MAINTENANCE GUIDE

**A timber floor can instantly transform any space in the home, so it is important to keep it looking its best. Proper care and maintenance can extend the life of your floor for many years. Over time, a re-coating may be desirable.**

**This simple guide will assist you in maintaining the natural beauty of your timber floor.**

### EVERYDAY CLEANING

Sweep or vacuum as often as necessary to remove any loose dirt or grit before it can scratch the floor. If a spill occurs, promptly soak up the bulk liquid. When mopping, only use a slightly damp mop; it is important to avoid using excessive amounts of water. Steam mops must not be used.

In high traffic areas, make use of a runner or area rug. To prevent scratching, use felt protectors under heavy pieces of furniture and chairs that are frequently moved.

Use protective mats at all exterior entrances. Do not use rubber-based furniture or mats as the rubber may leach into the floor.

### RESTORATION - SANDING & RE-COATING

Some timber floors can be sanded and re-coated with a polyurethane or water-based coating to restore the appearance of the floor. We recommend that sanding and re-coating of any timber flooring should only ever be carried out by a professional flooring contractor.

### VENEER SIZING

If your timber veneer is <1mm, it is not recommended for sanding and re-coating as the veneer is very thin, however the product can withstand a very light sanding for re-coating.

If the veneer is 3 – 4mm, the timber can be sanded and re-coated a maximum of 2 – 3 times over its lifespan.

PLANTINO LAMINATE DELUXE EXTRA  
Design Featured: Light Timber

**It's hard to tell the difference.**

These days it can be hard to tell the difference between actual timber and timber look laminate, as today's superior boards are made to mimic the same grain, character and wonderful texture of various timber species.

If you've got a large floor area to cover, or are simply keen to stick to a tight budget, the cost of laminate is incredibly attractive. For those who want a hardwood floor without the price-tag, laminate is a wonderful alternative as its far more affordable and creates a very similar look and feel.

## CARE & MAINTENANCE GUIDE

**Laminate flooring is incredibly resistant to day-to-day wear and tear and is both easy and cost efficient to maintain properly. The following maintenance guidelines will help to ensure that your laminate flooring always looks its very best.**

### PREVENTATIVE CARE TIPS

When moving heavy furniture or items back into position after the installation has been completed, use rigid protective sheets on the surface of your floor and avoid sliding or dragging furniture or appliances into place. In high traffic areas, make use of a runner or area rug. To prevent scratching, use felt protectors under heavy pieces of furniture and chairs that are frequently moved.

You may also want to consider installing window furnishings that will protect your floor from strong sunlight as laminate flooring can become discoloured when exposed to daily sunlight.

### REGULAR MAINTENANCE

Sweep or vacuum (bristles down) as often as necessary to remove any loose dirt or grit before it can scratch the surface of your floor. If a spill occurs, promptly wipe it up with damp cloth or damp mop, be sure to ring out any excess water.

Do not use abrasive cleaners, steel wool, or scouring powder on your floor and never wax or polish your floor. Steam mops must not be used.

### CLEANING KIT

We recommend using a manufacturer approved cleaning kit on your laminate flooring. Check with your Choices Flooring sales consultant on which product is right for your flooring.

There is a variety of cleaning products available that are practical and easy to use.
