AMSTERDAM

WATERPROOF - SUNPROOF - FADEPROOF - HEATPROOF

ULTIMATE NEXT GENERATION IN HIGH PERFORMANCE FLOORING

Proline Floors' latest and most innovative hard flooring range

Quantum is the culmination of years of research and development which brings to you the best of engineering and design.

We have sourced timber from around the globe for this incredible collection. Our designers have obsessed over the colour, texture and grain variation of each individual plank to bring you the absolute best design possible.

Quantum Next Generation Flooring has been manufactured specifically to endure the harsh Australian climate. Our iQ+ core utilises cutting edge materials to withstand expansion during our hot summers and to resist contraction throughout our cold winters.

During scientific testing, Quantum outperformed all of the current loose lay planks in the market. Results show that Quantum is 5 times more dimensionally stable than the nearest performing product in this category.

Not only does Quantum perform in a wide variety of climates, we have also incorporated high-end anti fade inks that are rated 40% higher than the European standard. This ensures that the floor will resist fading during the harsh Australian summer.

HOW DO WE ACHIEVE STABILITY?

Quantum utilises cutting-edge material science to enhance performance. The hallmark of a great vinyl plank is in its ability to resist thermal expansion and contraction. Using a combination of advanced fibreglass layers and anti thermal compounds that shrink when heated and expand when cooled, we have achieved the highest stability to date.

Dimensional Stability

This test measures the plank's ability to keep its original dimensions

- The product is heated to 80 degrees celsius for 6 hours.
- Measurements are taken before and after heating.
- This test shows that Quantum plank has a dimensional stability rating of 0.02%

This result is the best dimensional stability in the market.

Thermal Expansion Test

This test measures the change in length the plank will experience when heated from a cold state. It simulates the effects that real-world temperature changes will have on the plank's dimensions during a day.

	5 TO 80 C	5 TO 20 C (GAPPING)	20 TO 80 C (COMPRESSION)
Quantum	0.24mm	0.20mm	0.04mm
Competitor A	0.95mm	0.35mm	0.60mm
Competitor B	1.80mm	1.07mm	0.73mm
Competitor C	5.2mm	1mm	4.2mm

KEY FEATURES

QUANTUM
NEXTGEN

100% Waterproof

Sunproof

Suitable for hot and cold climates

Suitable for kitchens and laundries

Impact resistant

Slip resistant

Low VOC

No acclimatisation necessary

Pet friendly

Matching stair nosings

Compatible with under floor heating

European Inspired Colours

Selected from the finest European oaks, this exquisite collection of nine pre-finished vinyl planks will inspire you to create interiors that exude warmth and character.

Switzerland

EUROPEAN INSPIRED

SMART COMPOSITE CORE
High-tech intelligent core for unsurpassed stability

NEXT GEN TECHNOLOGY
Utilises cutting-edge material science to enhance performance

ULTRA HEAT RESISTANT
Designed specifically for Australia's harsh climate

Benefits:

HEAT RESISTANT

0.55mm WEAR LAYER

WATER PROOF

STAIN RESISTANT

MICRO BEVELLED EDGE

MATT FINISH

REALISTIC WOODGRAIN

ANTI-SLIP CERTIFIED

PET FRIENDLY

ACOUSTIC SOUND ABSORPTION

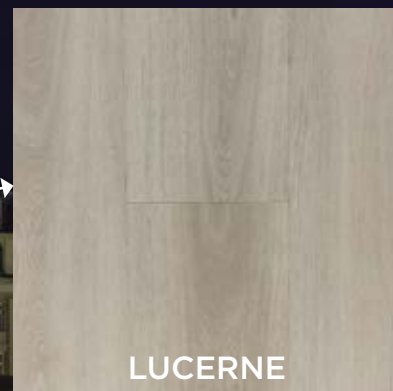

DURABLE

ECO FRIENDLY

Chapel Bridge
Lucerne,
Switzerland

LUCERNE

Chapel Bridge in Lucerne, Switzerland is the inspiration behind this stunning colour. Chapel Bridge is the oldest foot bridge in Europe and extends across the mineral rich waters of the river Reuss. Built in 1333 AD, the oak woods are constantly being tended to and replaced due to soaking up the minerals from the river below. These minerals turn the oaks from their natural colour into this stunning shade of grey and actually soften the timber. It would be impossible to have this timber laid directly on your floor as it is just too fragile, so we have taken the natural beauty of this timber and created the colour Lucerne.

Amsterdam
Canals

AMSTERDAM

Hundred year old oak trees growing along the world famous canals of Amsterdam needed to be removed for dike work to keep the city from being submerged. We managed to source some of this beautiful timber and use it as the inspiration behind our new Quantum Loose Lay colour Amsterdam. We used this timber in several different ways but the one pictured here is in its most natural form. Cross sawn to highlight the amazing cathedral grain, then lightly sanded to leave us with this stunning natural appearance.
